

MORE NEW TOOLS

Every one was especially designed to fill a real want--the Goodell-Pratt Tools always are. They are practical first of all. After that they are made the best way we know how, and we've been making tools a good many years.

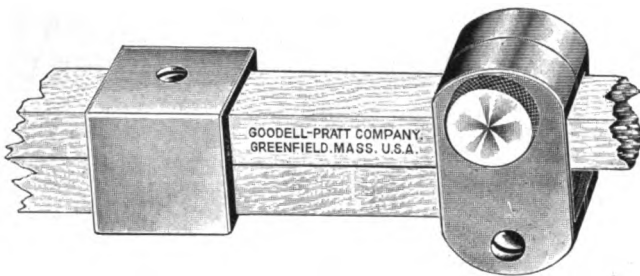

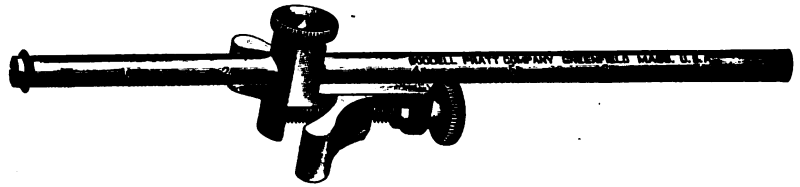

CIRCULAR OR OVAL GAUGE
No. 225

A Roller Gauge that can be used on straight work, but particularly designed for circles and ovals. Has 8 inch graduated beam with roller marker.

CIRCULAR OR OVAL GAUGE
No. 226

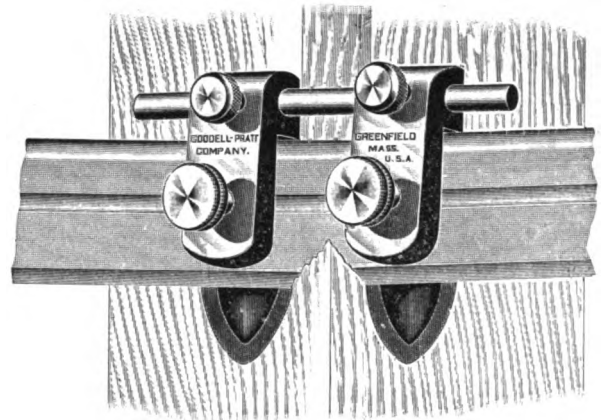

This tool differs from No. 225 (above) only in having a fine adjustment for the head for use on close work. The adjustment can be operated after head is clamped in position.

POLE COLLARS--Nos. 45 and 46

For use on either solid or adjustable measuring poles. The set consists of one solid and one adjustable clamp collar, each with an opening one inch square.

A great convenience for carpenters and mechanics in general. Two styles of finish--japaned or full polished and nickel plated.

DRAW-SHAVE GUIDE OR CHAMFER GAUGE
No. 44

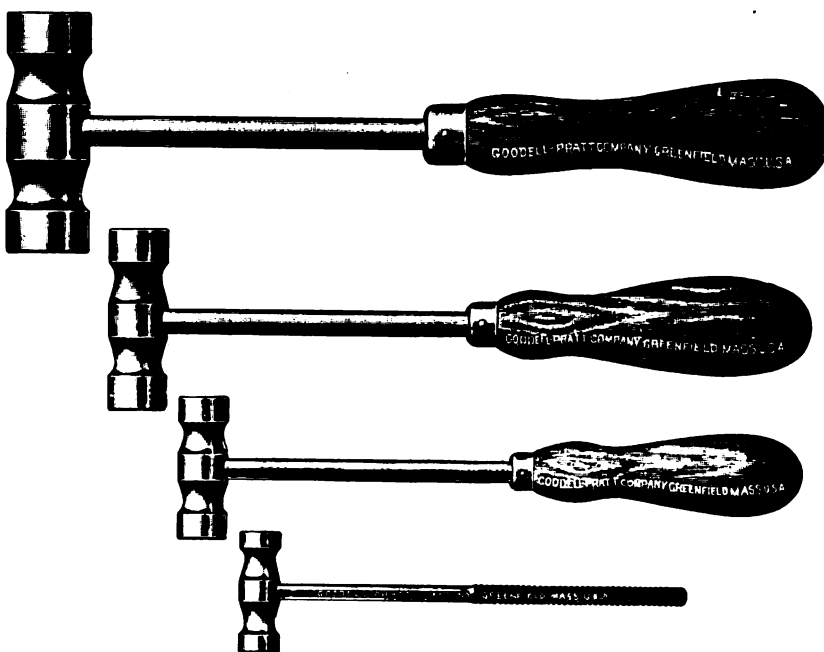

Designed and very useful for cornering heavy timber. Insures evenness and uniformity in width of the chamfer. Helps to do good work, and saves time. Can be attached to any draw-shave.

Write to-day for our Catalogue No. 7. You ought to have it. Free.

BRASS HAMMERS

Made for use on finished work. Convenient, practical, moderate in cost.
